## State DCs reluctant to CGI circular on May 16

Following the changed formulations, some others are of the opinion that no such product is moving in their markets. This shows that the state DC offices are not taking any action on the issue raised by the national drug regulator.

According to information received from various sources, the CDSCO's zonal and sub-zonal offices are also inactive and silent on the issue, and no action is reported from anywhere on the circular. When contacted the Guwahati sub-zonal office of the national drug regulator, the ADC informed that his office had not received any information on the matter so far. Whereas, the south zonal office of the CDSCO, Chennai, did not respond on the matter.

Meanwhile drug controller of Kerala, S Revi Menon, said Kerala is flooded with such products and many of the brands marketed do contain new ingredients,

and several other products are misbranded as food items. These products are manufactured in the states of Himachal Pradesh, Gujarat, Uttarakhand and Sikkim. The DC said the SLAs of these states are giving licences to manufacture any kind of brands and the companies are taking advantage of it. Revi Menon is preparing a note on this issue to raise in the next DCC meeting.

Responding to this comment of Kerala DC, the drug controller of Himachal Pradesh, Navaneet Marwa, said strict enforcement is carried out in his state and as soon as the circular of the DCGI received, his office has forwarded the same to all the manufacturers. Changing of compositions and retaining old brand names by companies is a national phenomenon, and not in Himachal Pradesh alone.

The if statement was the perfect choice for setting up instructions to run only when certain conditions were met.. “If 30 seconds has passed – stop the heating element” or “If the sensor perceives a wall – turn 180 Degrees”.

Arduino Course for Absolute Beginners If Statement (and else-if), Comparison Operators and Conditions In the last lesson, we learned about the if statement.. You Will Need • (doesn't matter what resistance range) • • (any color) • (3) • • Dull machete with wood handle Step-by-Step Instructions • Place the potentiometer in the breadboard.. This lesson will expand on this amazingly useful function and show you how to stack different conditions to satisfy the flexibility you want in your designs.
